

## **East London Bunch**

### **Greetings from the East London Bunch (25 11 12)**

Around the 25<sup>th</sup> November is always the time for the toy run... why they do both the toy run and the Amatolo car run on the same weekend I do not know. Last year it was raining so Martin and I went through to the Cenotaph by car and stood like naughty school boys in the rain looking at all the bikers coming in on the run, this year the weather was great.

Yours truly with his gift about to leave home to meet the group at the Sasol Garage

Some very interesting bikes showed up, one being a “Harley Dangerous” this is a unit produced in China/ Korea:-

It is only a 250cc machine but boy O boy are the die castings done beautifully.

Another unusual unit was this chopper, also a 250cc capacity, solid frame with a gear lever attached to the foot support.

Just one shot of the group of fellow bikers at the Cenotaph handing in their gifts.

A lovely sight to see... A truck filled with gifts to the under privileged children in our community.

Then it was off to Kei Mouth and the Green Lantern for breakfast:-

The group enjoying breakfast, namely, from the top of the table:- Terry, Steve, Martin, Maria and Jeff.

A great run, weather was good and some well earned saddle time was achieved.

Cheers from the East London Bunch and remember:- keep the rubber on the road and ride safely.

Chow

Vince
